Trans. of Khim[icheskaya] Prom[yshlennost'] (USSR)
1960 [vol. 8] p. 626-627

DESCRIPTORS: *Melamine, Solubility, Heat of
solution, *Ammonia, *Cyanamides.

Experiments showed that the solubility of melamine
depends on the concentration of dicyandiamide in
liquid ammonia. The fact that the solubility of
melamine in solutions of dicyandiamide in liquid
ammonia can increase or decrease with increasing
temperature, depending on the concentration of di-
cycandiamide in the solution, indicates that the heat of
solution changes sign as the concentration of di-
cycandiamide in the solution increases.
